

IMPENDING DISSOLUTION OF AUSTRO-HUNGARIAN EMPIRE.

First Step Toward Separation Will, It is Predicted, Occur During Present Year.

PARTING TO COME AS A RESULT OF LONG-STANDING TROUBLE IN THE REICHSRATH

VIENNA, Jan. 18.—Political prophets here state that the present year will see the first step taken towards the entire separation of Hungary from Austria.

The root of the difficulty is the permanent conflict between Czechs and Germans in Austria, whose rivalry causes the Czechs' wrath.

If the Government inclines to Czech views the Germans object; if to German views, the Czechs object.

The efforts to bring about a reconciliation and compromise during the parliamentary vacation failed utterly, so that the paralysis of the Reichsrath will continue this session.

The renewal of the compromise with Hungary must, however, be voted this year, for the present provisional compromise only extends till 1903. The Reichsrath will not be able to vote the renewal on account of the parliamentary deadlock.

Emergency Provided for.
The Austrian constitution provides for emergencies of this kind in paragraph fourteen, known as the "absolute" clause, whereby the Emperor may legislate by decree without the consent of Parliament.

This, it would appear at first sight, will remove all the difficulties of the situation. Hungary, however, flatly refuses to conclude a compromise with Austria unless constitutional government exists in the latter country. Hungary is on safe ground in insisting on this point, because the terms of union between Austria and Hungary, drawn up in 1867, provide that compromise must be approved by the Legislature of each half of the monarchy.

Hungary might get over this provision by passing a special law, suspending this part of the constitution of 1867, but there is no inclination on the part of the Hungarian Parliament to adopt the plan. Hungarian statesmen and politicians of all parties regard the introduction of absolutism in Austria as a severe blow to the strength and prestige of the dual monarchy and as a positive danger to constitutional government in Hungary.

Situation Likely to Come.
This, then, is the situation likely to come in the course of this year: Austria will not be able to renew the compromise by constitutional means, but will offer to do so by absolute methods; Hungary will renew the compromise if constitutionally voted in Austria, but will have nothing to do with absolute experiments.

If this deadlock, as is possible, continues until the present provisional constitution expires, Austria and Hungary will be on points of legal lore, will, they say, be brought out to advantage in support of the contentions now urged.

In other words the appeal, it is understood, is based particularly on the practice of the general courts of law and not of department methods of courts of equity.

Department Rules Passed Over.
As the plea for the appeal is for plain justice and the recognition of his rights according to the law of the land, there is no need of Mr. Rayner relying upon department rules of procedure which are said to vary at times in important details. The case having become a matter of national interest, it is regarded as but fitting that it should be judged not from the standpoint of naval practice or etiquette, but of common law.

Admiral Schley will reach Washington from Savannah, where he is now visiting, tomorrow evening or Monday morning, and immediately upon his return Mr. Rayner will then be gone over very carefully, signed and filed with the President.

PLANS CIVIL RULE FOR PHILIPPINES.
The formal document was quite voluminous, making over 100 pages of typewritten matter, much of it being closely written excerpts from the official record of the Court, cited in support of the claims set forth by the petitioner. All told, there are more than 25,000 words in the document, and it has been prepared with the most painstaking care and with great attention to detail.

To Keep Contents Secret.
The contents of the appeal will not be made known until after it has been filed with the President, who will make it public. But it is known that the general tenor of the plea advanced is the usual legal contention that the verdict is not in accordance with the facts or the evidence.

Great confidence in a favorable outcome is expressed by those friends of Admiral Schley who followed closely the testimony at the sessions of the Court of Enquiry. Mr. Rayner's sharp cross-questioning and occasional fits with the opposing counsel

FIXED THE FAMILY.
Grape-Nuts Set Them Right.
It is better to have a food epidemic in a family than an epidemic of sickness. A young lady out at Hingham, Minn., tells about the way Grape-Nuts won her family. She says: "When recovering from typhoid fever my doctor ordered Grape-Nuts Breakfast Food. I gained four pounds the first week, and, as the package was kept on the table for me, the whole family started to eat the new food."

"We soon noticed a difference in my younger brother's face, which had been pale and bloodless, and who had been suffering from chronic inflammation of the stomach. In a short time he began to eat so heartily that we all remarked about it, and before long he got so he could eat anything without the least bad effect."

"We often eat Grape-Nuts dry as we would easily do nuts, and it has a richer taste than when soaked in water. The best way is to put on some good, rich cream."

"My sister found that after we began eating Grape-Nuts she had a much greater supply of milk for her babe. We have quite eaten hot bread and meat for the evening meal and take in place some nice Grape-Nuts, with cream, and a little fruit, and have all improved greatly in health."

"Please don't publish my name." Name can be given by Postum Co., Battle Creek, Mich.

THE HOHENZOLLERN SETS SAIL.

Royal Yacht Left Kiel for United States This Morning.

BERLIN, Jan. 18.—The Imperial yacht Hohenzollern, which is going to the United States to be present at the launching of the Kaiser's new yacht, now building at Shooter's Island, left Kiel at 9:30 o'clock this morning.

The passage to the United States will take twenty-three days.

The Hohenzollern is well known as one of the most magnificent vessels in the world. She was built at Kiel in 1883, and though equipped at all points for Emperor William's pleasure might easily be adapted to the requirements of an Atlantic liner or a man of war. She is of steel construction, has twin screws and a double set of engines which give her a speed of twenty knots an hour. Then she has a ram and carries eight quick-firing Krupp guns. Her tonnage is over 4,500. All the residential part of the yacht is designed and fitted up in the most sumptuous manner, capable of carrying a large number of distinguished visitors, with their suites.

The Emperor's suite of rooms is on the middle deck, on the port side, and includes library, workroom, and smoking room. The Emperor's boudoir is even more elaborate, while there is a "family" saloon in blue and silver in addition to dining and more private meeting places for the voyagers on board. Every year the Emperor spends the most enjoyable part of his summer in a cruise on the Hohenzollern, taking pleasure and pride in navigating the vessel, whether in the Baltic or the North Sea, visiting the Norwegian coast or attending the races at Cowes. He has from time to time received American visitors on board, and when the Hohenzollern enters the Narrows, bringing Prince Henry to witness the launching of the new Imperial racing yacht from the Staten Island shipyard, her appearance is already so well known that she will be recognized with as much ease as she will be heartily welcomed.

No More Commercial Treaties.
It will mean, too, that the dual monarchy as a whole cannot conclude any more commercial treaties with other countries.

Austria will have to conclude one set of treaties and Hungary another set.

Another difficulty will arise. At present, the three ministers of the Crown, who are common to both Austria and Hungary, the Foreign Minister, the Imperial Finance Minister, and the War Minister, are subject to the control of the delegations, which are elected by the Austrian and Hungarian Parliaments.

If, however, absolutism exists in Austria, the Austrian-Hungarian cannot be elected, and certainly cannot be nominated by means of paragraph 14.

In such circumstances, there is considerable probability that the programme of the Magyar independence party will be adopted by the Hungarian Government. This programme demands a separate Foreign Minister and Diplomatic Corps and a separate army for Hungary.

To Be Separate and Hostile.
This is how things are drifting in the dual monarchy.

The racial feud in Austria paralyzes the Reichsrath and renders absolutism almost inevitable.

Absolutism in Austria, in its turn, prevents the renewal of the compromise with Hungary, and brings about the economic separation.

Economic separation, again, almost as inevitably leads to political separation. The only bond remaining between Austria and Hungary will then be their monarch, who is Emperor of Austria and King of Hungary.

This form of dualism is known as the "personal union" and is eagerly desired, not only by a parliamentary party numbering seventy members, but still more by the masses of the Hungarian nation.

From the "personal union" to absolute separation is a short and easy step, bound to follow sooner or later.

In ten years' time Austria and Hungary may well be two entirely separate countries, bitterly hostile to one another.

On points of legal lore, will, they say, be brought out to advantage in support of the contentions now urged.

In other words the appeal, it is understood, is based particularly on the practice of the general courts of law and not of department methods of courts of equity.

Department Rules Passed Over.
As the plea for the appeal is for plain justice and the recognition of his rights according to the law of the land, there is no need of Mr. Rayner relying upon department rules of procedure which are said to vary at times in important details. QUESTION GOES TO CONGRESS

Fixing the Date for the St. Louis World's Fair.

WANT \$2,000,000 APPROPRIATED.

Head Officials of Louisiana Purchase Exposition Divided Among Themselves as to Postponement. Difficulty of Getting Foreign Exhibits for 1903 Causing Trouble.

It is not improbable that Congress will be asked to postpone the St. Louis World's Fair from 1903 to 1904. According to statements made by managers of the fair it seems that the foreign Governments will be unable to have their exhibits ready before 1904, and without the foreign exhibits the fair, it is claimed, will not be a success.

The one question that is worrying the managers of the fair is: If the exposition is postponed will Congress refuse to appropriate the \$2,000,000 for the Government exhibit?

Anxious to Make It a Success.
Enquiry today among the friends of the fair developed the fact that the sentiment of Congress is decidedly in favor of any proposition that will make the exposition a success. Of course, there is no mistaking the desire on the part of all connected with the Louisiana Purchase celebration that the exposition open on schedule time—1903, the centennial of the purchase—but rather than have it prove a failure they are willing that it go over until 1904 in order that the foreign Governments may make an exhibit that will do credit to themselves as well as add to the attractiveness of the exposition.

It is but fair to state, however, that there is more or less friction between some of the higher officials of the administrative machinery of the exposition itself on the subject of postponement.

Views Not in Accord.
Mr. Adolphus Busch, general foreign representative of the Exposition Company and one of the heaviest stockholders, says that the celebration must be held over a year, or it will be a decided failure, as far as foreign exhibits are concerned.

Former Governor Francis, president of the Exposition Company, who is, with Mr. Busch, feeling the Government officials and members of Congress on the subject, is emphatic today, in his assertion that he is opposed to a postponement first, last, and all the time.

Despite Mr. Francis' emphatic assertions to the contrary, he is believed to be in favor of the postponement if it can be brought about without injuring the exposition's chances for the \$2,000,000 Government exhibit appropriation that the company will attempt to get from Congress.

BANDMEN MISS THE WHITE HOUSE LUNCHES
USED TO FEAST AFTER PLAYING.
Custom Went Out With McKinley. The Musicians Think President Roosevelt Was Not Informed By Attaches of Mansion.

"The Jayman has no idea how the continuous playing of a brass instrument for two or three hours will empty one's stomach and how weak one feels in that vital respect to human anatomy when the hour has come to pack up," said a member of the Marine Band today.

President McKinley had his thoughts everywhere when he was in the White House and very little escaped his observation, though he didn't make much fuss about it. Every time we had to play at the White House we had our little lunch after the performance was over. When we had finished the programme some member of the White House staff would come out to us, thank our leader in the name of the President and inform him that you will find lunch downstairs."

"But no one has informed President Roosevelt, evidently, of the previous custom, for I don't dare give the average richness of the vein at present. I shall be able to do so when I return from Phoenix."

CHARGED WITH ARSON.
John W. Green, Proprietor of Green's Hotel, Accused.

A warrant charging arson was sworn out, this morning, against John W. Green, the proprietor of Green's Hotel at the corner of First and B Streets southeast.

Green was arrested yesterday afternoon on suspicion of having started the fire which gutted the hotel yesterday morning. At the same time his housekeeper, Mamie Strong, was locked up at the House of Detention.

She is now held as a United States witness, bond being fixed at \$300. The case was continued in the Police Court, this morning pending investigations.

Martinielli Consistently Postponed.
ROME, Jan. 18.—The consistory for which Cardinal Martinielli will come to Rome to receive his red hat has been postponed. It will likely be held in May.

GERMAN-AMERICAN FRIENDSHIP DUE TO PRESIDENT ROOSEVELT'S BOLD STROKE.

Diplomatic Intimation Availed Of by the German Ambassador.

The recent sudden drawing together of the United States and Germany, with the result that Prince Henry is to visit the United States and that the President's daughter is to christen the Emperor's yacht, was accomplished, it is declared, through a bold stroke by the President, which set at defiance previous diplomatic usage.

The chief fruit of this stroke has been the complete understanding which has been reached between President Roosevelt and Emperor William with reference to the attitude of the United States and Germany to one another.

Defining Monroe Doctrine.
Some time ago, before the meeting of Congress, President Roosevelt indicated by an indirect means that if the German Ambassador would call on him in an unofficial way an informal conversation might result in an understanding of the purposes of the two nations which would contribute to the most cordial relations and dispel all suspicions that might threaten estrangement. Acting upon this hint, the Ambassador called on the President and the situation was discussed with a frankness seldom before disclosed in international exchange.

The Ambassador assured the President that the Emperor had no designs upon territory in any part of this hemisphere, and, in effect, declared a policy entirely in accord with recognition of the Monroe Doctrine; but suggested that the United States Government should not permit the Monroe Doctrine to be availed of by the smaller American Republics to avoid the payment of honest debts to the subjects of European Powers. A discussion of this

subject disclosed that there was no difference of opinion between the President and the Ambassador as to the proper limitations of the Monroe Doctrine, and complete assurance was given by the Ambassador as to the intentions of Germany.

Directly to the Emperor.
At the conclusion of the interview the understanding was reached that the views of President Roosevelt and the purport of the interview in its entirety should be communicated to Emperor William directly by the Ambassador. Direct communication was made, so that the interview was given, as nearly as could be, the character of a personal communication between the President and the Emperor.

This caused the utmost gratification to Emperor William, who immediately sought some means of giving public expression to his feeling of cordial friendship toward the United States, and to put official seal upon the strong bond of sympathy that had been established. The result of the interview was reflected in the definite declaration of the President as to the manner of applying the Monroe Doctrine, giving in his definition of that doctrine full recognition of the right of European Powers to demand and collect just debts and indemnities from American republics, without involving a violation of the doctrine intended for the preservation of the integrity of this hemisphere.

Intent of Incidents.
The intending of the yacht and the visit of Prince Henry are intended by the Emperor to express appreciation of the better understanding between the two nations and the cordiality of his own feeling toward this Republic. The visit of the Prince is expected to develop into an event of the greatest international political significance.

VAST WEALTH FOR TWO CHICAGO MEN.
INTERESTED IN GREAT GOLD FIND
Paul and Samuel Schenck, Salaried Employees, Find Themselves Suddenly Possessed of Property Estimated at Millions.

CHICAGO, Jan. 18.—From a salary of \$1,500 a year to the possession of millions is the sudden rise of fortune which Paul W. Schenck, who until yesterday was at the head of the purchasing department of Swift & Co., believes has come to him.

The good fortune is shared by Samuel W. Schenck, his brother, and both are now on their way to Phoenix to learn more of their new found wealth.

Great Find of Gold.
The brothers believe they will share in one of the most important gold discoveries of the century.

A vein of gold-bearing quartz, which is supposed to be almost inexhaustible, Schenck says, has been discovered in the mountains in the neighborhood of Phoenix. Reports from the experts who have examined it agree that the mine is fabulously rich.

Assays of ore have shown a high average and the holders of stock in the company which is developing the vein have suddenly come to the realization that they are millionaires in prospect. According to one of them, \$10,000,000 would not buy the holdings of the company, which is capitalized at \$500,000.

What the Property Is.
"We have no doubt of the value of the company's claims," said Paul Schenck before his departure for Arizona. "We would not take \$5,000,000 for our share today. My brother and I control about one-eighth of the stock of the company. We will draw dividends on one-sixteenth. The company has been developing the property for two years, and its engineers have traced the vein on the surface for a distance of 15,000 feet over the mountains. "Its greatest width on the surface is thirty-five feet and its least width is seven feet. Its depth we have not determined yet, but from indications the vein is practically inexhaustible."

"Assays of the ore have been made at different points and the average is remarkably high. I would not dare give the average richness of the vein at present. I shall be able to do so when I return from Phoenix."

CHARGED WITH ARSON.
John W. Green, Proprietor of Green's Hotel, Accused.

A warrant charging arson was sworn out, this morning, against John W. Green, the proprietor of Green's Hotel at the corner of First and B Streets southeast.

Green was arrested yesterday afternoon on suspicion of having started the fire which gutted the hotel yesterday morning. At the same time his housekeeper, Mamie Strong, was locked up at the House of Detention.

A MIRACLE-HEALER

RESTORES HEALTH AND STRENGTH TO CHRONIC SUFFERERS

BY A MIGHTY SUBTLE FORCE OF NATURE.

Starting Disclosures Relative to the Most Wonderful Power Known to Man—Doctors Fuzzed.

THE SICK HELPED FREE.

Professor Adkin Offers to Help the Sick and Afflicted Free of Cost—Hundreds Cured at Their Own Homes.

The Medical World has been startled by the wonderful cures effected by Professor Thos. F. Adkin, a distinguished scientist who is devoting his life to the relief of suffering humanity. People in the last stages of consumption; men and women living in constant dread of death from Bright's Disease, Blood Poisoning, Cancer, Dropsy, Heart Disease and other dangerous ailments have been restored to health by the use of this wonderful man, after every known remedy and scores of eminent specialists had been tried in vain.

Not in the history of Medical Science have so many startling cures been recorded. So marvelous has been his success in healing all kinds of disease that his patients call him a Miracle Man. A man of supernatural Power, a Physician with the key to the Fountain of Youth, says Professor Adkin declares there is nothing wonderful about his ability to cure disease, and says that he cures simply because he "understands nature."
